

PUGAZENTHI D

Data Engineer | Data Analyst

Chennai | 9360228112 | pugazh308@gmail.com | linkedin.com/in/pugazenthi | github.com/pugazh308

PROFESSIONAL SUMMARY

MSc Computer Science graduate and Data Engineer Trainee with hands-on experience in SQL Server, Snowflake, dbt, Python, and Power BI. Built end-to-end data engineering pipelines, AI-powered applications, and machine learning projects through industry training and academic work. Seeking a Data Engineer or Data Analyst role to deliver scalable data and analytics solutions.

TECHNICAL SKILLS

Languages — Python, SQL

Data & Analytics Stack — SQL Server, Snowflake, dbt, ELT, Power BI, Microsoft Fabric, Excel

Web & Backend — React 19, Node.js, Express, Django, PostgreSQL

Methodologies — ELT/ETL, Data Modeling

PROJECTS

Star Air — End-to-End Data Engineering Project

SQL Server · Snowflake · dbt · Python · Power BI

- Ingested source data from SQL Server (OLTP) to snowflake, then designed and implemented a 13-table galaxy-schema data warehouse in Snowflake using ELT pipelines.
- Developed 13 dbt models across staging, intermediate, and mart layers with snapshots for structured transformation, data quality validation, and testing.
- Delivered a Power BI dashboard covering business requirements like net revenue, top routes by revenue, and top-performing agents.

Automated Macular Disease Prediction — Deep Learning

Python · TensorFlow · Keras · ResNet CNN · Django · SQL

- Trained a ResNet CNN model in classifying 7 macular diseases from OCT retinal scans.
- Built a Django web app enabling healthcare providers and patients to upload scans and receive real-time AI-driven predictions.
- Integrated TensorFlow/Keras with a SQL backend; designed an accessible interface for clinical use — final year project, DG Vaishnav College.

DeutschMate AI — German Language Learning Web App

React 19 · TypeScript · Node.js · Express · PostgreSQL · Azure OpenAI · Google Gemini · Tailwind CSS

- Built a full-stack AI-powered app for Goethe Institute German certification prep (A1–C2); unlike static apps, lessons and practice questions are dynamically generated by AI — adapting to each user's level and progress.
- Features include mock tests, flashcards, speaking practice, and personalised learning paths across all Goethe levels.
- Backend: Node.js + Express, Prisma ORM over PostgreSQL (Neon), JWT auth; Azure OpenAI primary with Google Gemini fallback via unified AI service layer.

PROFESSIONAL EXPERIENCE

Data Engineer Trainee · Systech Solutions · January 2026 – Present

- Completed structured training in SQL Server, Snowflake, dbt, Python, Microsoft Fabric, Power BI, Data Warehousing, and Data Quality Assurance.
- Built ELT pipelines using Snowflake, and dbt through project-based assignments.
- Built an end-to-end data engineering solution using SQL Server, Snowflake, dbt, Microsoft Fabric, and Power BI.
- Performed data validation and quality assurance to verify data accuracy and transformation logic.
- Created interactive Power BI dashboards to analyse business metrics and present insights.

Data Analyst Intern · NoviTech R&D Pvt Ltd · July 2025 – August 2025

- Applied CNN and predictive modelling to real-world datasets; cleaned and analysed large data using Python (NumPy, Pandas, Seaborn), SQL, and Excel (Power Query, PivotTables, VBA).
- Built Tableau and Power BI dashboards translating analytical findings into actionable business insights.

EDUCATION

MSc Computer Science — DG Vaishnav College | 2025

BSc Computer Science — SRM University | 2023

CERTIFICATIONS

Microsoft DP-700: Fabric Analytics Engineer Associate *(In Progress)*
